Fleet management solutions

Improve efficiency and profitability of fleet operations.

Your challenges

Businesses that operate and manage vehicle fleets face increasingly complex operations due to regional expansions, strict national regulations, increased fuel and maintenance costs, and loss of productivity resulting from vehicle downtime. These factors are increasing the competitive pressure in the transportation sector. To improve profitability and remain agile, your company needs to streamline processes involving your vehicles.

How can fleet management processes be optimised?

Your vehicles will depreciate and may not appear new, affecting their residual value or price when they need to be remarketed in the used vehicle sector. These vehicles can benefit from repair, conditioning and value assessment in order to maximise your returns. Managing your vehicle fleet also involves extensive and time-consuming paperwork and administration. Finally, fleet managers need to ensure the wellbeing and ongoing training of their workforce.

How do fleet management services benefit your business?

Fleet management solutions can include the reconditioning of used, returned and remarketed vehicles to minimise residual value risk. Your company will see an improvement in profitability as a result of greater returns from used vehicles. In addition, implementing quality and process optimisation will help you to streamline your administrative activities, increasing work efficiency and allowing you to focus on your core business. When it comes to your company's workforce, professional driver training and occupational health and safety services will ensure that your people remain fit and productive.

How can we help you?

TÜV SÜD can serve as a trusted partner to your fleet management business. Based on our understanding of your business needs, we can provide complete solutions that ensure your fleet operations run smoothly.

Our fleet management solutions

TÜV SÜD provides fleet management solutions that cover all aspects of your transportation operations.

Business services

■ Quality and process optimisation

Our experts can advise you on improvements to your fleet operation processes and quality standards. We also provide computer-based tools that automate processes for better efficiency.

■ Environmental efficiency

We analyse critical points of your operations and provide suggestions to help reduce carbon emissions and fuel costs based on our GreenFleet® concept.

■ Documentation services

TÜV SÜD can efficiently manage vehicle registrations and administrative paperwork for your business.

■ Occupational health, safety and training

We can review your accident prevention policies and propose occupational health and safety programmes. Our experts also design training programmes to ensure safe and sustainable driving capabilities for your drivers.

Vehicle services

■ Used vehicle management

Our experts can recondition, coordinate repairs and conduct independent assessments of your used vehicles before they are remarketed to maximise your returns.

■ Damage assessments

TÜV SÜD offers damage assessment reports that cover issues related to insurance settlement.

■ Value appraisals

We provide vehicle appraisals to determine depreciation and value for commercial purchase.

■ Vehicle inspection

TÜV SÜD offers expert technical inspections, including emission testing and vehicle modifications to ensure overall safety and meet the requirements of authorities.

■ Cargo securing assessments

We can ensure that your cargo is secured correctly and meets regulations on the safe transportation of goods.

Your business benefits

- **Maximise profitability** – by optimising your operations, streamlining processes and maintaining a sustainable advantage over competitors.
- **Increase productivity** – with complete solutions that increase the operational readiness of your fleet and build the operational skills of your drivers.
- **Minimise risks** – to your business, your vehicle fleet, your workforce and your workplace.
- **Enhance brand image** – as an environmentally responsible business that adopts carbon-neutral practices to lower fuel costs and minimise carbon emissions.
- **Ensure reliable operations** – through strengthened driver skills and solutions that minimise vehicle downtime.

Why choose TÜV SÜD?

TÜV SÜD has a long history in transportation and safety, with over 100 years of experience in providing solutions to make mobility safer and more reliable. Leveraging our expertise ensures that your fleet operations are optimised for efficiency and profitability. Due to our reputation as a neutral and independent service provider, partnering with TÜV SÜD will enhance your credibility as a quality-oriented company. Our customer-focussed approach to quality and safety results in solutions that provide long-term value to your organisation. We also help you to minimise operational, occupational and safety risks to your operations.

Choose certainty. Add value.

TÜV SÜD is a premium quality, safety and sustainability solutions provider that specialises in testing, inspection, auditing, certification, training and knowledge services. Represented in over 800 locations worldwide, we hold accreditations in Europe, the Americas, the Middle East and Asia.
