Effective management systems

Maximise potential with a trusted partner

Your challenges

The positive impact of effective management systems is well-proven as they deliver multiple business benefits, including enhanced performance, reduced risk and improved quality. Consequently, management systems are implemented in a wide range of sectors across the world, such as aerospace, automotive, chemical processing, healthcare and information technology.

Each organisation pursuing a management system certification has its unique operational and cultural characteristics, which should be the focus for the implementation of a successful management system. A one-size-fits-all approach will not deliver genuine value to your business, and it is crucial for the auditor to acquire a thorough understanding of the individual dynamics of your company. To release the full potential of your management system, a trusted expert is therefore the key to success.

How can we help you?

TÜV SÜD is a leading provider of management system services. We support organisations worldwide with auditing and system certifications in areas such as IT security, energy, environment, health, quality, risk and safety. Working with our customers in a close partnership, we align with their specific organisational priorities to deliver customised audit planning and execution that assures them of a smooth certification process.

Gaining a management system certificate with TÜV SÜD demonstrates harmonisation with regulatory acts and global standards, and signals a strong commitment to continuous improvement. Furthermore, the audit findings can help the management team monitor more effectively crucial outputs such as process quality and customer satisfaction.

Contact us to benefit from the extensive experience of our auditors, as well as our transparent approach to the certification process. If you already hold a management system certificate, you can easily transfer to TÜV SÜD at any point of your certification cycle.

Smooth transition to TÜV SÜD

Organisations holding one or more management system certifications can switch to TÜV SÜD at any time, even during the validity period of the certificates. By working with a trusted partner such as TÜV SÜD, you can be assured of a smooth transition, as well as continued validity of existing certificates.

- As a first step, please contact us for a quotation tailored to your needs. Your organisation will be asked to submit audit reports previously prepared by your current certification body, along with all findings issued by the certification body for the sites/ locations covered under the applicable certification scheme's transfer audit.
- Once the order is placed, the TÜV SÜD auditor will align the audit plan with your organisation and schedule the next regular audit, depending on the status of your certification cycle. Until you obtain your new TÜV SÜD certificate, the existing certificates remain valid under their defined conditions.
- Following the successful certification transition process, our internationally recognised TÜV SÜD certification mark can be applied by your organisation.

Why choose TÜV SÜD?

As TÜV SÜD's auditors hold national and international accreditations for combined auditing exercises, you can be certain that your certification will be conducted with the highest degree of professionalism and conformance to international guidelines and standards. In addition, our auditors are required to follow a strict code of conduct through Auditor Codex, assuring both you and your customers of our complete independence and impartiality.

The TÜV SÜD certification mark

TÜV SÜD's certification mark is widely recognised and respected around the world as a trusted symbol of quality and safety.

As our certification marks and certificates represent third-party endorsement by a globally renowned organisation, this demonstrates your compliance towards continuous excellence, inspiring greater confidence amongst your business partners and customers.

Choose certainty. Add value.

TÜV SÜD is a premium quality, safety and sustainability solutions provider that specialises in testing, inspection, auditing, certification, training and knowledge services.
